

# STRUCTURAL ENGINEER'S REPORT

## GUIDELINES FOR REPORTING IMPACT OF TREE ON STRUCTURE

**1**

Structural engineer report should be laid out on company letterhead.

**2**

Should include Engineer's State License number.

**3**

Should explain and verify if and how the roots are impacting the structure and the consequences of the impact.

**4**

Should explain what methods may be used or actions are needed to be taken to resolve the existing impact, e.g. the tree needs to be removed, or if the structure can be reinforced without removal of tree.

**5**

Should include pictures that show and correspond with comments.
